ROCK SOLIDLY RELIABLE

## **GL-AT 106**

### **Intelligent asphalt extension analyzer**

## PRODUCT APPLICATION

This instrument is suitable for measuring the length of oil asphalt at a certain speed at a certain speed by the method specified in GB/T4508-2010 or T0605-2011 standard. This equipment is a set of asphalt extension, asphalt measurement force delay, asphalt elastic resilience test in one of the multi-purpose asphalt test of asphalt test.

## Product Specifications

SPECIFICATIONS	GL-AT 106
Power supply	AC220V $\pm$ 10%, 50Hz
Measuring range	1.5m ( $\pm$ 10mm)
Heating method	electric heater heating
Heating power	3500 W
Bath fluid circulation	shielded hot and cold balance booster circulation system
Temperature range	5 ~ 50°C (adjustable)
Digital temperature display resolution	0.001
Temperature control accuracy	$\pm$ 0.1°C
Tensile speed	10-50mm/min (two gears)
Measurement accuracy	$\pm$ 1mm
Extended display	industrial control touch screen real-time display
