ROCK SOLIDLY RELIABLE

GL-AT 118
Asphalt mixture fast separator

PRODUCT APPLICATION

This product conforms to the provisions of T0722-93 (centrifugal separation method) in the test of asphalt mixtures for JTJ-93 road engineering, which is used to determine the asphalt content in the asphalt mixture, and the detection of asphalt materials in the construction of hot-mixed asphalt mixtures to evaluate the quality of the products of the trembling plant. It is also suitable for the detection of the asphalt content of the old asphalt road. The asphalt solution separated by this method can be recycled asphalt to assess the aging nature of the asphalt. Generally applicable to highways, bridge construction and research institutions and other departments.

Product Specifications

SPECIFICATIONS	GL-AT 118
Bowl weight	3kg
Power	0.75kW
Power supply	AC380V ± 10%, 50Hz
Speed	1300 to 3000r/min
Dimensions (l x w x h)	450 x 450 x 450mm
Weight	45kg
Dimensions (l x w x h)	450 x 450 x 450mm
Weight	45kg
