ROCK SOLIDLY RELIABLE

GL-GT 300

Coarse-grained soil head permeator

PRODUCT APPLICATION

The GL-GT 300 coarse-grained soil permeability meter is used to determine the penetration coefficient of coarse-grain soil and grade-type gravel with a maximum particle size of not more than 75 mm. The equipment meets the TB10751-2018 "Quality Acceptance Standard for the Construction of High-speed Railway Road Foundation Project.

Product Specifications

SPECIFICATIONS	GL-GT 300
Water supply tank volume	80 L
Metal cylinder inner diameter	300 mm
Metal cylinder height	500 mm
Metal cylinder wall thickness	10 mm
Number of pressure tubes	5
Pressure tube inner diameter	6 mm
Pressure tube scale	1 mm
Pressure hole spacing	50 mm
Water seepage hole diameter	16 mm
Spill pipe inner diameter	16 mm
Permeable plate aperture	3.5 mm
Weight	150 kg
