ROCK SOLIDLY RELIABLE

GL-LT 1100

**Static load anchoring test
machine**

PRODUCT APPLICATION

Microcomputer control electro-hydraulic servo anchoring test machine is mainly used in railway bridges and water conservancy, power and other infrastructure construction of steel strands - anchors of static load anchoring performance test, used in accordance with GB/T14370-2007 "prestressed basket anchors, fixtures and connectors" steel strands anchors and low-week load performance test, in order to determine whether the steel strands.

Product Specifications

SPECIFICATIONS	GL-LT 1100
Maximum experimental force	5000 kN
Measuring range	250-5000 kN
Power value error	±1%
Displacement measurement range	0-200 mm
Figure error	±1%
Repeated	±1%
Relative resolution	0.5%
Long-term stability	1%
Piston stroke	200 mm
Stretch spacing	3400 mm
