ROCK SOLIDLY RELIABLE

**GL-SP 40**

**Low temperature test chamber  
(vertical)**

## PRODUCT APPLICATION

Building materials, medicine, scientific research, and other departments use our factory's low temperature test box extensively for low temperature and aging testing because of its reasonable design, high cooling efficiency, low noise, lovely appearance, and generosity. High-precision sensors and imported compressors are used in the apparatus, which offers the benefits of smooth operation and highly accurate temperature control.

## Product Specifications

SPECIFICATIONS	GL-SP 40
Temperature control range	-40 °C to room temperature
Compressor power	2000 W
Power Supply	220 V , 50Hz
Studio size	800 × 400 × 650 mm
External size	940 × 550 × 850 mm
Weight	120 kg
