ROCK SOLIDLY RELIABLE

GL-DI 2424B

**Three-property testing equipment
for building door and windows**

PRODUCT APPLICATION

The products produced are widely used equipment for scientific research, quality inspection, production, and other testing units. The three-property testing equipment for building doors and windows must meet the national standard requirements for the physical properties of doors and windows (three properties).

Product Specifications

SPECIFICATIONS	GL-DI 2424B
Power Supply	AC 380V, 18.5 kW
Wind Pressure Resistance Range	-7000 ~ 7000 Pa
Air Flow Measurement Range	0 ~ 500 m ³ /h
Deformation Test Range	0 ~ 50 mm
Pressure Transmitter Accuracy (Wind)	0.25
Pressure Transmitter Accuracy (Vac)	0.5
Pressure Transmitter Accuracy (Water)	0.25
Air Flow Meter Accuracy	3.0
Displacement Meter Accuracy	0.25 level
Displacement Meter Resolution	0.01 mm
Test Piece Size	600 × 600 mm ~ 2400 × 2100 mm
Spray Volume Range	100 ~ 1000 L/h
